<p><b>Note:</b> Mobile cranes are typically designed and intended for hoisting materials rather than lifting personnel. Measures taken to adequately safeguard personnel who are lifted by a crane shall include, but are not limited to, the following:</p>				
Location of Work:		Yes	No	N/A
1.	The person specifically responsible for the overall work function to be performed shall determine that there is no practical alternative way to perform the needed work or gain access to the area, and shall authorize the personnel lift;			
2.	A pre-lift meeting shall be conducted to ensure that every worker involved with the lifting operation receives adequate instructions about the requirements, restrictions, and hazards associated with the hoisting operation;			
3.	the crane manufacturer’s applicable instructions shall be followed;			
4.	the crane shall not travel while personnel are on the platform;			
5.	the crane shall not be used for other purposes while personnel are on the platform;			
6.	personnel lifting shall not take place when wind speeds exceed 25 km/h (16 mph) or when electrical storms, snow, ice, sleet, or other adverse weather conditions could affect the safety of personnel;			
7.	an adequate means of reliable communication between the worker on the platform and the crane operator, in accordance with Clause 6.5 of CSA Z150-20, shall be established, maintained, and used;			
8.	sufficient lighting for the job shall be provided; and			
9.	adequate means of evacuation or rescue procedures, including procedures for work in remote locations, shall be established and communicated in writing to all workers involved with the lifting operation.			
	<b>Note:</b> Single-part line or two-part line should be used. Please review CSA Z150-20 Safety Code on Mobile Cranes for additional criteria.			
	<b>NOTE:</b> Consult with Total Health & Safety (Safety Specialist) and/or other SME(s) as necessary to verify these criteria.
