

TIPS TO MANAGING WINTER ENERGY COSTS

In New Brunswick, many homes are heated with electricity. During winter our electricity usage can account for 50% of a home's annual energy use to keep us comfortable.

Here are some ways you can take control of your bills this winter:

- Seal up drafts around windows and doors
- Use programmable thermostats while sleeping or away
- Upgrade home insulation to keep heat in
- Balance out your bills each month with equalized billing

Having trouble keeping up with your bills?

We can help by setting up a payment plan to help you get back on track. Log in to your NB Power account and select payment arrangements or give us a call.
