

Putting the power in your hands

Smart meters are one of the ways NB Power is modernizing the power grid to provide you with the best possible service into the future.

Note: Provincial deployment pending Energy and Utilities Board (EUB) approval

What are the benefits of smart meters?

KNOWLEDGE IS POWER

Your online access to detailed energy information will help you make informed usage decisions.

QUICKER SERVICE

Smart meters enable us to remotely connect and reconnect service to your home so you get quicker service at a time that's convenient for you.

GREENER OPERATIONS

NB Power can do more work remotely and that means fewer visits and lower carbon emissions.

FASTER POWER RESTORATION

In many cases, smart meters will send notices to NB Power when the power is out. This allows us to start the restoration as quickly as possible so we can get the power back on faster.

SAVE WITH HIGH BILL ALERTS

You will be able to set up alerts to let you know when your energy use goes up and get tips on how to lower it so you can stay on budget.

A MODERN GRID

Smart meters are part of a new modern digital energy network that will benefit all New Brunswickers.

We want to hear your thoughts on smart meters
