

Canadian Navigable Waters Act

NB Power hereby gives notice that a submission has been added to the Common Project Search (online registry) pursuant to the *Canadian Navigable Waters Act* described herein and its description.

Pursuant to paragraph 4.1 and 9.1 of the said Act, NB Power has deposited with the Minister of Transport, on the on-line Common Project Search Registry (<http://cps.canada.ca/>) and under registry number 15857, a description of the following work:

The Saint John Corridor Project involves the construction and operation of a new 138 kV double-circuit overhead transmission line, adjacent to an existing transmission line corridor. The new transmission line will be erected adjacent to the existing crossings at two locations on the Saint John (Wolastoq) River. The crossings are designed to maintain safe navigation and are in the vicinity of Sullivan Road and Greenhead Road (crossing the Saint John [Wolastoq] River near Farrys Cove) and Quarry Road and Highland Road (crossing the Narrows).

The project will span the river without in-water works, maintain safe navigation conditions at all times, and provide long-term infrastructure supporting regional electrical reliability.

Posted at Saint John, New Brunswick this 10 day of October, 2026.
